Celebrating
Swachhata
Pakhwada

Swachhata Action Plan Day

Nirmala Convent School, Siliguri

SWACHHATA PAKHWADA-2021 NIRMALA CONVENT SCHOOL, SILIGURI ACTION PLAN DAY 13th and 14th September, 2021

Swachhata Pakhwada,
the cleanliness drive launched on 1st September under the Swachh Bharat Abhiyan,
has touched every Indian and has successfully arrived at its 13th and 14th day.
These days mark the actions undertaken by Indian citizens to clean their surroundings.
However, the world still being within the threatening clutches of the pandemic, it is
potentially not possible for the students
to visit the sites which are in utmost need of cleaning. Hence, the activities
of these days have been presented virtually, with unsurpassable enthusiasm,
by the students of Nirmala Convent School. We, the Nirmalites have taken up our
beloved school and our dear hometown as the themes of these days since they
are the most familiar areas to us and facilitate us to carry out our objectives freely.

*Creating
Awareness*

The virtual program of Nirmala Convent School comprised a wide range of activities, namely, display of useful articles prepared out of waste(BEST OUT OF WASTE). Students enthusiastically participated in the talk show and debate session where they expressed their views and shared about their experiences about Swachhata Pakhwada missions. The session was followed by interactive quiz session about the vaccination drive, COVID protocols and how cleanliness is absolutely necessary in preventing diseases. The noble Nirmalites did not forget to express their profound gratitude to the frontline workers who have relentlessly rendered their services, day and night, right from the beginning of this pandemic to maintain cleanliness in the best possible way. The Swachhata Pakhwada has prominently highlighted the utmost need of cleanliness and hygiene. Our student, undoubtedly have put their best foot forward to give this mission a glorious toast of success.

Creating Awareness...

Our real heroes

The school entrance

School ground and basketball court

Our school corridor

Solar panels
